

Andrea Builders and Construction

Andrea Construction Limited is registered by the Kenya government as a general building contractor category G under registration number BK3\13\166 of December 2005. The company offers a full range of preconstruction and construction services. The project teams maintain a strong foundation of honesty, trust and mutual respect generated through positive relationships with clients, architects, engineers, subcontractors and suppliers. A company-wide policy encouraging shared performance responsibility ensures the highest degree of professional service and results on all projects undertaken.

Pre-Construction Services

Through clarification of and commitment to project team goals, Andrea Construction Limited provides the project owner and architect with control of the project's schedule, budget and quality. This is accomplished with studies, expert advice in construction means and methods and confirmation of the Andrea Construction Limited project team's understanding of these goals with mockups, samples and investigations of existing product installations.

Andrea Construction Limited believes the identification of team goals to be one of preconstruction's primary objectives. A draft schedule incorporating these goals with the anticipated construction activities and entitlement process displays logic, relationships and anticipates potential team goal challenges. The preconstruction schedule serves as the road map for design development, decisions pertaining to project scope, budget and procurement. Thus, the Andrea Construction Limited approach offers a controlled, effective use of preconstruction resources consistent with the progress required to acquire government approvals needed to complete the project on time and within budget.

General Construction Services

Andrea Construction Limited provides in-depth management and supervision of all of its projects with hands-on involvement by the company's principals and project supervisors from start to finish. In addition to general building, Andrea Construction Limited also provides added value to clients with its ability to perform structural and architectural concrete work, including superb finishing. The photographs of the various construction works we have undertaken attest to our ability and value addition.

Andrea Construction process encompasses an information system for the project to coordinate the owner's and architect's goals. This comprehensive system includes numerous components ranging from scheduling, cost control, and prudent procurement.

Construction Management Services

At Andrea Construction Limited, the construction management services team provide assurance to the owner/client of a well-run, problem-free job site. The team of experienced construction professionals provides cost control, scheduling coordination, quality control and timely execution of plans throughout the project. Andrea Construction's knowledge of local building codes, life safety requirements, permitting, environmental concerns and other local requirements in the construction process provides a timely and on-budget completion of the project according to plan. The owner's/client's interest is represented throughout the project, from start to finish, to ensure schedule compliance and optimize the client's/owner's investment in the project.

Design/Build Services

Andrea Construction Limited also offers Design and Build Services to all clients satisfaction. In design/build projects, clients contract directly with a single entity (Andrea Construction Limited) to provide both design and construction services. In such cases, we provide a team of experts or as a joint venture and can offer clients with a number of advantages. Planning, design, engineering and construction responsibilities are integrated under one single source — Andrea Construction Limited, thereby facilitating effective project delivery by streamlining the overall process.

Our design/build project success is accomplished by applying a comprehensive project team management delivery system. The Andrea Construction team's experience covers a broad range of professional services, from consulting and feasibility studies, to the complete design engineering and construction expertise to fully implement a project. The planners, designers, engineers and builders work in concert throughout the entire project towards the common goal of providing a quality product at a competitive price.

Projects — Value, Quality and Experience

Andrea Construction Limited has built a wide range of projects, of all sizes, for a diverse client base. Each project encompasses both the high quality and value that Andrea Construction brings to each of its projects. These projects

include building renovations and upgrades, institutional buildings, government premises, schools, office structures, hotels, studios, entertainment and sports/recreation facilities, retail, restaurants, industrial buildings and parking structures.
